

# Patient Connect

## Home Healthcare Monitoring Solutions for Retirement Villages

### High Quality Independent Living

Tailored 24/7 Home Healthcare monitoring with a afterhours home visiting doctor service.

Patient Connect is improving the quality of care and support for Retirement Villages and Aged Care Facilities throughout South East Queensland. We specialise in products and services such as Home Healthcare Alarms, Fall detectors, monitored Smoke Alarms and carry out all projects large or small with a high level of professionalism, quality and care.

#### Our Service to Retirement Villages:

- All projects are managed by an experienced Project Manager to ensure that deadlines are met and product testing is executed upon completion.
- We tender all project quotes and proposals based on a competitive pricing structure, and you will find with the additional services Patient Connect can offer, the benefits are far greater.
- Patient Connect clients are all monitored by a 24/7 response team to ensure that help is always available.
- Following alarm activation, our friendly response team member will stay on the line until help arrives. We will call friends, family, care managers, the ambulance if required, along with sending a home visiting Doctor.
- All Patient Connect clients receive a 2 year complimentary membership to the Family Care Friendly Society. This ensures that residents can access the after hours doctor service with no out of pocket expenses (all visits will be bulk billed).
- All clients who use the after hour's doctor service are eligible to receive a selected range of complimentary pharmaceuticals from their home visiting doctor.
